The Spring 2016 launch of the Advanced Gear Research (AGR) program provides a glimpse into the future of the Maxpedition brand. Uncompromising durability, combined with modernized aesthetics and a broadened palette of custom materials and components, elevate Maxpedition equipment to a new level of quality, innovation, and sophistication. With the implementation of expanded factory production, in-line & end-line quality checks, independent quality assurance, state-of-the-science laboratory testing, and all-environment field trials, Maxpedition is poised to meet and exceed the expectations of its discerning clientele. Founded in 2003, Maxpedition successfully optimized the design ethos of American military-grade MOLLE gear to suit the needs of everyday life and popularized its functionality to a global audience. Often imitated but never equaled, genuine Maxpedition gear is the benchmark against which others are compared, and it is trusted by special forces operators, law enforcement officers, adventure travelers and prepared citizens around the world. Now Maxpedition transcends the standards it set for the industry. The first and best victory is to conquer self. -Plato
